

## THE NEXT GENERATION APPLICANT TRACKING SYSTEM

**OneSOURCE® Workforce Management** is a comprehensive solution that lowers the time to hire and cost per hire and, even more importantly, improves the quality of each hire.

**OneSOURCE®** is a single integrated system that can manage all of your hiring - both non-exempt and exempt. Utilizing WizardDrive<sup>SM</sup> authoring system, the industry's most advanced, user-friendly interface, clients can achieve implementations and changes faster than any other ATS on the market today. It's so simple, it virtually eliminates the need for user training.

**OneSOURCE®** offers all of the functions found in both the leading non-exempt and exempt systems and a significant number of functional innovations not found in any other system.

### **A Low-Cost System**

With the system's simple, revolutionary design, implementation is generally at least 30% less than competitors charge. Annual fees are typically 50% (or more) less than what companies had to pay for two systems - with the "two systems" problem solved.

### **A Real-Time System**

Virtually all system management is "real time"-from the set-up of locations, entry of job descriptions, development of pre-qualification questions, to the development of the on-boarding events for a specific job.

### **Automated Scheduling**

**OneSOURCE®** includes multiple schedules per location, allowing separate schedules for different steps, people and locations, saving applicants and the hiring team valuable time.

### **Real-Time Graphic Reports**

**OneSOURCE®** produces real-time graphic reports and offers ad hoc reporting capability.

### **Live 24/7 Support**

Industry-leading, guaranteed uptime is further supported by 24/7 live help desk support.

### **A Self-Service System**

By offering WizardDrive<sup>SM</sup>, a company can even elect to do some or all of the entire implementation steps, letting them save even more.

### **Highly Configurable**

**OneSOURCE®** was designed to be highly configurable to meet clients' different needs, without having to incur the cost of customization.

### **Validated Assessments**

Pre-hire predictive, validated assessments are now integrated into the ATS, eliminating a common recruiter frustration.

### **AllAboard<sup>SM</sup>**

Online computer software for managing the on-boarding of new hires.

Our fully automated on-boarding process is position-based and reflects the fact that not all positions have the same on boarding process.
